PROJECTS

Comparative Study of Estimate Between Commercial Building and Green Building.

6 Months

Green building refers to both a structure and the application of processes that are environmentally responsible and resource-efficient throughout a building's life-cycle: from planning to design, construction, operation, maintenance, renovation, and demolition. The detail estimate is made of both the building having same plan.

Service Analysis of Newly Introduced AMC Smart City Bus.

6 Months

Urbanization, Growth of cities, increase in population, Transportation problems, congestion, accident, delay, increase in number of vehicles, with extension of urban area trip length has also increased, travel demand increase, thus it has become necessary to provide city bus service.

It is often noticed in the public transportation that each of us require to travel from one place to another to access the service or job. Smart City Transportation survey is being done for safe, efficient, reliable, and sustainable movement of person and goods over time and space.

ACTIVITIES

Wording, Writing, Speaking

Public Participation and Effective Communication.
